

MPSCS Bulletin # 2018 - 01

The MPSCS needs to perform a maintenance update to the system for Home Zone Mapping. This is applied at the System level and will put all sites into site trunking for approximately 1 minute.

The update will be applied on 2/8/18 at 4AM (0400).

Dispatch centers are encouraged to review their backup plans and have them in place prior to the site trunking event. With all sites in site trunking, radios will be able to talk to radios affiliated to the same tower. Radios will not be able to talk to another radio affiliated to a different tower, so plan accordingly.

Please share this information with your staff and users of the system to minimize disruptions to your organizations.

If you have an active emergency prior to the scheduled outage time at a tower site, please contact the NCC and request they temporarily delay until the emergency has stabilized. If the site outage has started, the site will not return to wide trunking until the update to the system has completed.

The MPSCS NCC may be contacted at (888) 554-4622 or (517) 333-5050 if you have a question regarding the operation of the MPSCS or need assistance preparing for this event.
